Summary

Enthusiastic and driven B.Sc. IT (CTIS) student, deeply passionate about programming and adept in Python and Java. Eagerly pursuing an entry-level software developer role at [org name] to channel my passion into innovative solutions. Thriving on collaboration, continuous learning, and a commitment to excellence, I'm poised to contribute effectively to your dynamic team and shared success.

Internship

CodSoft (Jul 2023-Aug 2023)

- Contributed to a virtual internship where I developed and maintained Python-based applications for impactful projects. Demonstrated expertise in creating applications such as calculators, to-do task lists, and password generators during this period.

Achievements

April 2023 — Participated in "Hack with iNurture" led the team in pitching and exclusively focused on implementing the "Bibliophile" book donation platform's front-end design.

Aug 2023 — First place in college coding competition (CODEWAR) - iNurture Education Solutions Pvt. Ltd.

Sept 2023 — Participated in Smart India Hackathon 2023 and successfully pitched the idea for "The Bharatian Law" website, aiming to present India's laws in a filtered manner. While the website wasn't developed, our team received appreciation for the innovative idea and effective pitch during the event.
